

ITS 362
Quiz 3
Sharyl Riley
February 3, 2022

1. Create a webpage with a title called "QUIZ 3: jQuery Basics".
2. A second line with an input box where you can enter text with label "Enter Cell Value: ".
3. Create a table with two a single column and a header row.
4. Create a CSS file that describes a class for a table border (double line 2 pixel) a text border (single line, 1 pixel), a red Color for text, and text alignment to the center.
5. Create a button labeled "Turn Text Red" which uses jQuery to turn the top label text red.
6. Next (inline) with the entry box create a button with the label "Add to Table" which adds the data entered into the textbox into the table.
7. Add a button that aligns the text in the table to be centered.
8. Add a button that puts a border between all the cells in the entire table.
9. Add a button to remove the border.

Entered 2 cell values, added border,
red to label text, centered text

Changed border around table
