

## QUIZ 4

ITS 362

jQuery Widgets

Sharyl Riley

February 9, 2022

1. Create a web application where you enter a date in an entry box.
2. Associate a jQuery UI datepicker widget with the entry box.
3. Create a button that calls a JavaScript function that uses jQuery to add the date as a new row into a table.

Upon entry the datepicker and table are hidden:

## QUIZ 4: jQuery Widgets

Pick a Date:
